SUMMARY

Software Engineer specializing in full-stack development, building enterprise-grade systems from ERP platforms and mobile applications to AI tools. Proficient in Flutter, ASP.NET Core, Node.js, and SQL Server, with a proven track record of delivering secure, scalable, and high-performance solutions.

EXPERIENCE

Speed of Light

Feb 2026 – Present

Software Engineer

Gaziantep, Türkiye

- Building an enterprise ERP end-to-end utilizing ASP.NET Core Web API services, desktop-grade Flutter UIs, and high-performance SQL Server reporting infrastructure.
- Developing core business modules including sales, inventory, customer-account, and production management.
- Implementing secure authentication, licensing, and data-security processes to protect sensitive factory data.
- Engineering robust integrations with existing ERP and Logo software systems.

Affura Plast

Oct 2025 – Jan 2026

System Administrator

Gaziantep, Türkiye

- Maintained the factory's digital infrastructure, overseeing server installation, maintenance, and monitoring.
- Managed backup and disaster-recovery operations to ensure operational continuity and zero data loss.
- Configured firewalls, network security protocols, and handled user access management.

Mena Bilişim

Feb 2024 – Jun 2025

Software Developer

Erzurum, Türkiye

- Developed enterprise backend services with ASP.NET Core Web API and designed optimized SQL Server databases.
- Shipped high-quality Flutter mobile applications utilizing the BLoC pattern for efficient state management.
- Managed mobile-backend integration, API lifecycles, and data security including JWT authentication and license validation.
- Provided maintenance, feature enhancements, and bug fixing on live production projects.

EDUCATION

Atatürk University

2022 – 2026

B.Sc. in Software Engineering

Erzurum, Türkiye

- Cumulative GPA: 3.23 / 4.0

SELECTED PROJECTS

AffuraAI (NL2SQL AI Layer)

2026

ASP.NET Core 10, Flutter, Ollama, MSSQL, RAG, SSE

- Developed an AI layer for a live ERP enabling users to query the database using plain language.
- Built an NL2SQL pipeline with vector-based RAG retrieval and real-time SSE streaming for live charts.
- Implemented a "SQL Guard" to ensure a read-only, SELECT-only execution context for data security.

ERPv3 — AffuraPlast

2026

.NET 8, Clean Architecture, SignalR, EF Core, Flutter

- Engineered a full ERP system managing sales, procurement, work orders, and quality gates for a plastics factory.
- Designed dynamic permission-based authorization with in-memory caching and real-time state synchronization via SignalR.
- Integrated QuestPDF/JsReport for reporting and developed a stock availability algorithm with proactive shortage alerts.

Magazam

2025

Flutter, Firebase, Cloud Functions

- Created a smart retail management application bridging spreadsheets and expensive POS systems for small businesses.
- Implemented hybrid cloud/client analytics with automatic offline Dart fallback and real-time Firestore synchronization.

YKS Smart Study Assistant

2025

Flutter, Ollama, DeepSeek, GitHub API

- Built an AI-powered study coach utilizing DeepSeek for batched LLM question generation across 426+ concepts.
- Leveraged GitHub as a version-controlled CMS via REST API to securely manage the question bank.

TECHNICAL SKILLS

Languages: C#, Dart, JavaScript, TypeScript, Python, C++, C, SQL, PHP

Mobile & Frontend: Flutter, BLoC, Provider, Material 3, Responsive UI

Backend & APIs: ASP.NET Core, Node.js, Express, SignalR, SSE, REST, JWT, Clean Architecture, DDD

Databases: SQL Server, MySQL, MongoDB, Firebase, Firestore, EF Core

AI & Data: Pandas, NumPy, TensorFlow, Keras, RAG, Ollama, Prompt Engineering

Spoken Languages: Arabic (Native), Turkish (C1), English (B1)
